ORDER

As part of our commitment to environmental sustainability, we are taking significant measures to reduce our carbon footprint and minimize environmental degradation. Hence, to reduce our plastic waste, the use of single-use plastic water bottles will no longer be endorsed within the premises of the office. To aid in this transition, the Directorate of Urban Local Bodies will be providing each employee with a stainless-steel water bottle. It is robust, reusable, and most importantly, environmentally friendly. Further to ensure the health and safety of all employees, we have installed a RO Water filter system in the office. All employees are advised to fill their water bottles from this RO filter.

I trust that each one of you will understand the significance of this directive and adhere to it diligently. Let's make our office a beacon of environmental responsibility and sustainability.
